

FOR IMMEDIATE RELEASE

October 27, 2007

**MAYOR JERRY SANDERS
MEDIA ADVISORY**

SOLEDAD LANDSLIDE INVESTIGATION CONTINUES

Friday, 3:00 p.m.

Note: We are not expecting any new developments over the weekend. A news release is not planned for the weekend at this time. Media contact is on call.

TODAY'S ACTIVITIES:

- A new hole is being dug on the north side of the landslide within the public right of way (street) for the purpose of completing a perk test so that the rate at which any water is moving can be determined
- The 100 foot boring hole was filled today on the north side of the public right of way (street)
- The geotechnical engineers and the geologists on site are logging the 55 foot boring hole in front of one of the red tag properties on the east side of the public right of way (street)
- The reading of the inclinometer and of the pizometer continues in order to determine any soil movement and moisture in the soil (respectively).
